Sunshine Canyon City/County Landfill Waste Acceptance Averages

The site has been operating as a Joint City/County Landfill as of January 2009. Waste acceptance averages for each month of the second quarter of 2019 are shown below. The site is permitted to accept 12,100 tons per day (TPD) maximum daily capacity (M-S).

Month	Non-buried, Recyclable and Beneficial Reuse Material (Tons)	Total Landfilled Material (Tons)	Averages (TPD)	
			Mon - Fri	Saturday
April	13,928	190,973	8,628	3,773
May	16,998	192,263	8,518	3,340
June	22,799	177,496	9,138	3,505

Notices of Violation

For the second quarter of 2019, Sunshine Canyon Landfill did not receive a Notice of Violation.

There were no violations or Area of Concerns received from the LEA in the second quarter of 2019.

[Sunshine Canyon Landfill Hotline Report](#)

- Operational 24/7
- Call for information about Sunshine Canyon Landfill including questions regarding disposal rates, tours, complaints or comments.
- 32 calls received during 2Q2019; six calls were from a SCAQMD inspector.

Landfill Gas Monitoring

The latest Rule 1150.1 Quarterly Monitoring Report was submitted in May 2019 for the first quarter of 2019. This report contains the results of the monthly surface emissions monitoring (SEM) (instantaneous and integrated), results of the monthly monitoring of the site's perimeter gas probes and other information as required by SCAQMD's Rule 1150.1.

The results of the first quarter instantaneous SEM showed the following number of locations exceeding the regulatory threshold of 500 parts per million (ppm) Total Organic Carbon (TOC) for the reporting period: April – 16 locations on 387 grids monitored; May – 9 locations on 387 grids monitored; June – 9 locations on 387 grids monitored. The results of the first quarter integrated SEM showed the following number of grids exceeded the regulatory threshold of 25 ppm TOC for the reporting period: April – 6 grids out of the 387 grids monitored; May – 5 grids out of the 387 grids monitored; June – 7 grids out of the 387 grids monitored.

For the first quarter, the locations where the readings exceeded the regulatory threshold were brought back into compliance by the 2nd monitoring event.

Storm Water Controls

There is a comprehensive surface water management system at Sunshine Canyon Landfill that includes perimeter and interior drainage channels, four permanent sedimentation basins and several temporary basins to remove sediment from surface water leaving the site. The site operates under a statewide General Industrial Storm Water Permit. That permit defines the rainy season as Oct-May. Monitoring of runoff water quality is conducted in accordance with the site's permit requirements.

Operations Update

Sunshine Canyon is committed to operating the site in an environmentally responsible manner. With environmental systems in place to control potential odors, while setting conditions for future responsible landfill management, we continue to take multiple actions in 2019 to enhance our systems and continue to serve as a good neighbor in our community. These actions focused on three key areas:

Control Waste Odors on Site

- Diverting organic waste from the landfill so it does not have a chance to create off-site odor
- Inspecting waste loads before they arrive and on-site to effectively manage them or divert them to other locations
- Applying an environmentally friendly daily cover at the end of each day to control odor on-site
- Using sprayers on working face equipment to prevent and neutralize potential off-site odor

Closure Turf

- The 26 acres of closure turf continues to perform wonderfully. Closure turf is an impermeable synthetic liner overlain by artificial turf that supports the landfill gas collection system.

Winterization

- Sunshine Canyon Landfill's winterization efforts performed spectacularly with the unprecedented 30+ inches of rains we received over the last few months. Our site is currently in the planning stages for the upcoming rainy season, we will continue to improve our controls.

Gas Infrastructure Improvements

- SCL continues focus on gas infrastructure improvements by prioritizing vertical and horizontal gas collectors, along with optimizing our vacuum headers.

Tours at the Landfill

Tours are always welcome at Sunshine Canyon!

To find out how, please visit us at: SunshineCanyonLandfill.com or call 800.926-0607

S.A.F.E. Centers

The Los Angeles City, Bureau of Sanitation operates S.A.F.E. Centers so residents can properly dispose of household hazardous waste materials such as Solvents Automotive Elammables and Electronics. The closest S.A.F.E. Center to the Granada Hills area is located at:

10241 N. Balboa Blvd.,
Northridge, CA 91325
Hours of operation:
Saturdays & Sundays
9 am—3 pm

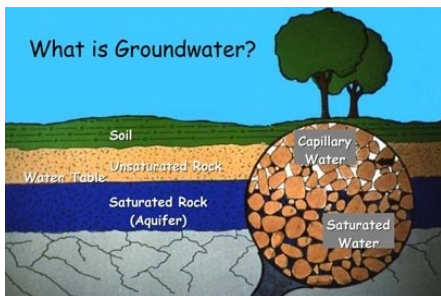

For more information, please visit the Bureau's website — www.lacitysan.org. You will find a complete listing of the materials that can be brought to a S.A.F.E. Center for free disposal.

Groundwater Monitoring

The Groundwater and Waste Disposal Monitoring Report for the Second Semi-Annual Annual Monitoring Period of 2018 (RWCQB File No. 58-076) was published in February 2019. The report can be found at: www.sunshinecanyonlandfill.com

Vegetation

The Vegetation Report for the first quarter of 2019 was submitted to the agencies in April 2019. This report details the status of the various vegetation activities that are being conducted on the site.

The sage pilot project continues to thrive with many new seedlings emerging. Quarterly monitoring is conducted by a third party biologist as well as a landscape architect consultant; these reports are included in the quarterly monitoring reports.
